PROFESSIONAL SUMMARY

Detail-oriented Frontend Developer with 2 years of experience building scalable enterprise web applications using React.js, Next.js, and modern JavaScript. Skilled in Microfrontend architecture, REST API integration, and performance optimization.

PROFESSIONAL EXPERIENCE

Software Developer

Digital Regenesys

📅 Oct 2024 - May 2026 📍 Gurgaon, India

- Developed and maintained enterprise-level web applications using React.js and modern JavaScript
- Implemented complex state management solutions using Redux and Redux-saga for large applications
- Built responsive user interfaces with Bootstrap and Material-UI ensuring cross-browser compatibility
- Integrated RESTful APIs and handled asynchronous operations with modern JavaScript patterns
- Optimized application performance through code splitting, lazy loading, and component optimization
- Implemented Microfrontend architecture using Module Federation to enable independent deployment of application modules
- Designed scalable frontend architecture by splitting large applications into reusable microfrontend modules
- Collaborated in agile teams to deliver features and improve project delivery processes

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), HTML5, CSS3
- **Frontend:** React.js, Next.js, Redux, Redux-saga, React Hooks
- **Backend:** Node.js, Express.js, RESTful APIs, Middleware
- **Styling:** Bootstrap, Tailwind CSS, Material-UI, PrimeReact
- **Databases:** MySQL, Database Design, Query Optimization
- **Tools:** Git, GitHub, npm, Webpack, Babel, PM2

SOFT SKILLS

- Problem-solving • Team Collaboration • Communication • Adaptability

CERTIFICATIONS & ACHIEVEMENTS

- [Full Stack Web Development Bootcamp Certification - Udemy](#)
- [Full Stack Web Development Certification - Masai School](#)
- 5 Star Gold Badge in Problem Solving on HackerRank
- Solved 250+ coding problems across multiple competitive programming platforms
- Developed 15+ full-stack web applications using modern technologies
- Secured 1st Prize in Masai School Monthly Project Competition for building a high-quality full-stack application

EDUCATION

Full Stack Web Development

Masai School

📅 Mar 2024-Oct 2024 📍 Bangalore, India

- Intensive full-stack web development program focused on MERN stack, DSA, and modern web technologies
- Built multiple full-stack applications using React.js, Node.js, Express.js, and MySQL

Bachelor of Computer Science

Delhi University

📅 Mar 2020-Mar 2023 📍 Delhi, India

CGPA: 7.0/10.0

PROJECTS

Global Calendar (Microsoft Teams Integration)

- **Technologies:** Next.js, React.js, JavaScript, Module Federation, Material-UI, Microsoft Graph API, OAuth 2.0
- Developed a Global Calendar application integrated with Microsoft Teams Graph APIs enabling one-click meeting and webinar creation with configurable roles such as attendee, co-organizer, and presenter
- Built a unified form-based interface for managing participants and meeting configurations, reducing meeting setup time by 40%
- Implemented automated synchronization to ensure all created meetings are reflected across Microsoft Teams and user calendars
- Architected the frontend using Microfrontend architecture with Module Federation to allow independent feature deployment and scalability

Activity Logging System (Enterprise Monitoring Solution)

- **Technologies:** React.js, JavaScript, Node.js, REST APIs, Material-UI
- Designed and implemented an enterprise-wide activity logging system to track operations across Finance, User Management, Enrollment, and Academic modules
- Developed a standardized logging framework capturing metadata such as user, timestamp, module, action type, and payload for complete traceability
- Enabled administrators to search, filter, and audit activity logs in real time, improving transparency and operational monitoring
- Integrated the logging service with multiple backend modules ensuring consistent and reliable event tracking across the platform
