Dear Hiring Team,

I am writing to express my interest in the Apprentice Trainee Developer position at Oceaneering.

I am a software developer with over two years of professional experience, having previously worked as an Assistant Developer where I built web applications, backend systems, REST APIs, and automation solutions using Python, FastAPI, PostgreSQL, Redis, Docker, and modern software development practices. Throughout my experience, I have developed a strong foundation in software engineering principles, problem-solving, debugging, and building scalable applications.

What excites me about this opportunity is the chance to work within Oceaneering's global technology ecosystem and contribute to applications that support complex engineering and business operations. The opportunity to collaborate with experienced developers, learn new technologies, and contribute to large-scale enterprise applications aligns perfectly with my career goals.

My experience includes designing and developing backend services, integrating APIs, working with databases, optimizing application performance, and collaborating with cross-functional teams to deliver reliable software solutions. I am comfortable learning new technologies quickly and enjoy exploring innovative approaches to solving technical challenges. Additionally, I have recently worked on AI-powered workflow orchestration and automation systems, which further strengthened my understanding of software architecture and scalable application design.

I am particularly drawn to Oceaneering's culture of innovation, collaboration, and continuous learning. I believe my technical background, proactive mindset, and passion for software development would allow me to contribute effectively while continuing to grow as an engineer within your organization.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my skills and experience can contribute to Oceaneering's success.

Sincerely,
Dhruv Kaura
